FAHAD EQBAL HASHMI

eqbalfahad@gmail.com | +917250864992 | Linkedin | Noida, Uttar Pradesh

PROFESSIONAL SUMMARY:

Backend focused Software Engineer with 2.5 years of real-world experience building high throughput, critical backend systems in .NET/C#. Owned and delivered end to end scalable backend systems for automation systems across the country and 2+ systems internationally for major FMCG/Quick Commerce, e-commerce, retail and logistics players. Proficient in Agent-based and AI-assisted workflows like Codex, cursor, antigravity to accelerate delivery.

SKILLS:

Backend: .NET, C#, RabbitMQ, Windows Services, RESTful APIs, Unit Testing, OOPs, API Design.

Databases: MySQL, SQL Server, Stored Procedures, Database Design, with exposure to NoSQL databases.

Tools & Cloud: Claude Code, Antigravity, Cursor, Codex, AWS, GCP, Git, GitHub, Bitbucket.

Other: RAG, AI Agents, Data Structures & Algorithms, System Design, Debugging & Root-Cause Analysis, Cross-team collaboration, Documentation, decision-making, Agile development practices, and learning.

PROFESSIONAL EXPERIENCE:

Software Engineer – Falcon Autotech *July 2024 - Present*

- Architected high-throughput core sortation services capable of handling extreme loads, successfully processing over 100,000 parcels a day and built to reliably sustain peak loads of 10,000+ parcels per hour.
- Delivered an end-to-end automation project for one of India's largest retail companies, integrating PTL (Put-to-Light) systems, conveyors, a .NET web backend, and client-facing RabbitMQ integration APIs.
- Developed PLC communication layers to interface software systems with physical sortation hardware on the warehouse floor.
- Implemented cron-based job schedulers for automated report generation, data syncing, and system health monitoring.
- Writing optimized stored procedures and managing SQL data flows aligned with high-volume sortation system requirements.
- Managed a 2.5-month on-site deployment in Madrid, Spain to integrate critical sorting and warehouse automation software for a major European last-mile e-commerce logistics provider.

Salesforce Developer Intern – TheSmartBridge *May 2023 – July 2023*

- Completed 3+ cloud projects and 10+ comprehensive Salesforce modules.
- Developed custom applications using Apex and Flows to automate business processes.
- Implemented Shield Platform encryption to enhance data security.

Frontend Developer Intern – Ulavi Technologies *Jan 2023 – May 2023*

- Built attraction ticketing website with React and Tailwind CSS.
- Achieved 20% reduction in page load times through performance optimization.
- Adopted Agile methodologies for 25% faster project delivery.

EDUCATION:

Bachelor of Technology (B.Tech), Computer Science and Engineering – Amity University, Noida *2020 - 2024*

Study-Abroad semester at Adelphi University (New York, USA) and Birkbeck, University of London (UK)

PUBLICATIONS:

- A Pilot Study of a Gamified CBT-Based Digital Approach for Body Image Distress and Appearance-Related Concerns - **Human Behavior and Emerging Technologies** *July 2026*
- Impact of Colour Image and Skeleton Plotting on Sign Language Recognition Using Convolutional Neural Networks (CNN) - **IEEE** *March 2024*

CERTIFICATIONS:

- AWS Academy Graduate
- Elements of AI (University of Helsinki)
